Non-GAAP Financial Measures:

In this release, the Company presents adjusted EBITDA attributable to common shareholders, adjusted net income attributable to common shareholders and adjusted net income attributable to common shareholders per diluted share as supplemental measures of performance of the Company, which are not recognized under United States generally accepted accounting principles ("GAAP"). The Company presents adjusted EBITDA attributable to common shareholders, adjusted net income attributable to common shareholders and adjusted net income attributable to common shareholders per diluted share because it believes that they are important supplemental measures of its comparable controllable operating performance and it wants to ensure that its investors fully understand the impact of its stock-based compensation (net of any related tax impact) on net

income attributable to common shareholders. Management uses these measures to review operating performance on a comparable basis from period to period. However, these non-GAAP measures may not be comparable to similarly titled amounts reported by other companies. Adjusted EBITDA attributable to common shareholders, adjusted net income attributable to common shareholders and adjusted net income attributable to common shareholders per diluted share should be considered in addition to, and not as a substitute for, net income and other measures of financial performance reported in accordance with GAAP.

The Credit Facility provides that the Company will be required to maintain a Fixed Charge Coverage Ratio (as defined in the Credit Agreement) of not less than 1.1:1. The Company will also be required to maintain minimum EBITDA (as defined in the Credit Agreement) of \$90.0 million on December 31, 2014, which requirement increases to \$100.0 million on December 31, 2015. The Company must also maintain a Maximum Total Leverage Ratio (as defined in the Credit Agreement) of 2.00:1 on December 31, 2014, which requirement decreases to 1.75:1 on December 31, 2015. The ratio of total debt to EBITDA was nil:1 as at September 30, 2014, where Total Debt (as defined in the Credit Agreement) is the sum of all obligations evidenced by notes, bonds, debentures or similar instruments and was \$nil. EBITDA is calculated as follows:
